

Download everything you need to host
your own Peace is Possible event.

Peace is Possible · Quick guide for hosts

PEACE26 · A GLOBAL PEACE ACTIVATION

Set up anywhere you normally gather. Use it in your own events. Share what you learn so we can all learn together.

1

Start wherever you are drawn

Surviving, Living, Sustaining, Thriving.
One is plenty. All four if you have the time.
Do your own reflection or read what others share.

2

Walk the rings

Me → We → Us → Beyond. What does peace feel like in each domain close in, and farther out. Your everyday, your neighborhood, your country, the world.

3

Capture & share

Draw or write on the poster. Use markers or sticky notes. Print it to explore on a table or wall. Send a photo of your finished piece to **XXX**. Join in on **Sept 22** or any day in **October**.

ME	WE	US	BEYOND
What do you need, day to day, for peace to feel possible?	Who in your life or neighborhood is struggling just to get by, and what would make peace possible for them?	Where in this region is survival still not guaranteed, and what would change that?	Where in the world is survival hardest right now, and what do you wish for them?
Where in your own life do you feel most free to be yourself?	Where does your community fall short of fairness, and what would make belonging possible for everyone?	What would it take for everyone in this country to be treated with the same dignity?	What injustice, somewhere in the world, do you find hardest to look away from, and what would peace ask of us there?
What's one way you personally care for the earth that makes peace feel possible?	How is your community caring for, or struggling with, the land and water around it?	What worries you most about how this state treats its land, air, or water, and what would make it right?	What part of the natural world, anywhere on earth, do you most want protected?
What would it take for you to truly thrive, not just get by?	What could your community build together that would help everyone thrive?	What would it take for opportunity to thrive across this whole region, not just some places?	What partnership or collaboration, anywhere in the world, gives you hope that peace is possible?
SURVIVING	LIVING	SUSTAINING	THRIVING
This one's about having enough to feel okay — food, health, safety, water.	This one's about being treated fairly, and belonging.	This one's about caring for what keeps us all alive — the land, water, and air.	This one's about building forward, together — good work, strong places, real partnership.
